

QObject

ComponentBase

pacpus::SickComponent

```
classDiagram
    QObject <|-- pacpus::SickComponent
    ComponentBase <|-- pacpus::SickComponent
```

The diagram illustrates a class hierarchy. At the top, there are two base classes: 'QObject' on the left and 'ComponentBase' on the right. Below them, centered, is a derived class 'pacpus::SickComponent'. Two arrows point from the 'pacpus::SickComponent' box upwards to the 'QObject' and 'ComponentBase' boxes, indicating that 'pacpus::SickComponent' inherits from both.
